

Amendments to the Specification:

Please replace paragraph 23 on page 7, with the following rewritten paragraph:

*A1*  
[0023] That is, according to the present ~~intention~~invention, it is possible to easily draw a realistic image of a shimmering image of an object or an area which shimmers under the influence of heat waves of a flame, exhaust air or the like. Such an image can be utilized, for example, for drawing an area around a flame or exhaust air from a motor vehicle in a background for allowing a user to enjoy an exciting video game.
